ABSTRACT

Disclosed is an organic electroluminescent element comprising an anode, a cathode and a component layer including a light emission layer, the component layer being provided between the anode and the cathode, wherein the component layer contains a compound represented by formula 1, Formula 1

$$X_1 - (A_1)_n$$

wherein A_1 represents a group represented by formula 2; Formula 2

$$-Ar_1-N$$

$$(R_2)_{nb}$$
